

BMW E46 M3 Performance Air Intake

Carbon fiber air intake system for 2000-2007 BMW M3 models

DTM race technology improves the power and throttle response of BMW's sublime performance coupe. Replacing the factory components with our insulated carbon airbox and custom air filter, the system offers increased volume, enhanced flow velocity and reduced inlet temperature for noticeably better engine performance. The autoclaved carbon fiber construction results in components of unparalleled strength, lightness, and beauty. Installs in under an hour without modification and meets OEM specifications.

FEATURES:

- Increases horsepower and torque
- Improves throttle response and fuel efficiency
- Maintains factory emissions components
- Fits vehicles with manual or SMG transmissions
- Unique thermal barrier composite construction ensures low inlet temperatures.

PERFORMANCE:

- Power increase: 9-12 hp
- Torque increase: 7-10 lb/ft

APPLICATIONS:

- All 2000-2007 BMW M3 models (including cabriolet)
