

Frequently Asked Questions

Ferrari 430 Challenge Shift Paddles

1. Will installing the Carbonio product void my manufacturers warranty?
 - No. According to law, no manufacturer may void a vehicle warranty because after market parts are fitted. Only the warranty on the specific part or consequential parts can be affected by the installation of aftermarket components. To that end, Carbonio products are sold and installed by many factory dealerships, both domestically and internationally.
2. Where can I get replacement parts?
 - Selective replacement parts can be purchased at www.carboniodirect.com while specific components can be purchased directly from Carbonio.
3. Is the installation reversible?
 - Yes. Installation of Carbonio products is totally reversible and do not require any cutting or modifying of existing factory components. This is particularly useful for leased vehicles that need to be returned as delivered by the factory.
4. How is the carbon manufactured?
 - Carbonio products are manufactured using techniques normally reserved for the aerospace industry. Multiple layers of resin impregnated carbon fabric (pre-preg or sometimes called "dry carbon") and proprietary thermal-barrier composite is vacuum bagged and baked in a pressurized autoclave to yield thin, yet exceptionally strong parts. Once removed from the mold, parts then receive multiple coats of UV resistant urethane clear and are polished to a high luster finish.
5. What warranty does the product carry?
 - All Carbonio products carry our Unlimited Mileage Guarantee. Details of the warranty are available in the 'Policies' section of the website.
