

**INSTALLATION INSTRUCTIONS FOR CARBON CUP HOLDER  
FERRARI 355 360 (excl. CS), 430 (excl. Scuderia), 456, 550  
MASERATI Coupe & Cabrio 2002-2003**

Thank you for choosing to purchase a Carbonio product. Please take the time to fully read over these instructions before attempting to install the kit. This will greatly speed up the installation process and minimize any difficulties you may encounter.

**Tools Required:**

- Phillips head (star) screwdriver

**Kit includes:**

1 – Carbon fiber cup holder  
1 – Rubber base  
1 – Cigarette lighter relocation assembly (optional)

**Step 1:** Flip open the ash tray lid and pull out the inner tray. On Ferrari 360 models remove the cigarette lighter insert.

**Step 2:** Using a Phillips headed screwdriver remove the single screw holding the ash tray assembly in place. With this screw removed the entire ash tray assembly can be lifted out.

*The following only applies to Ferrari 360 models*

*On 360 models disconnect the wire that connects to the base of the cigarette lighter and the wire that leads to the light on the side of the lighter assembly. The wire that led to the light is no longer used and can be set aside within the console.*

*If you choose to relocate your cigarette lighter, there is an optional re-location assembly. This assembly has a red lead and a black lead. The red lead is + and goes to the side of the cigarette lighter connector that originally led to the **CENTER** of the base of the cigarette lighter. The black lead is – and goes to the side of the cigarette lighter connector that originally led to the **SIDE** of the base of the cigarette lighter.*

*Route the new cigarette lighter assembly to wherever gives you the most convenient access.*

**Step 3:** Install the carbon fiber cup holder in the area vacated by the ash tray. Using the original mounting screw, locate the OEM mounting hole and screw the cup holder in place. Before tightening, make sure the cup holder is well centered and then tighten the screw down. Snug is all that is necessary and there is no need to over-tighten.

**Step 4:** A circular rubber disc is included to act as a base for the cup holder. This can be either placed or adhered using the attached double sided tape.

**LABOUR ESTIMATE GUIDE**

**5 Minutes**
